## Case Study One: Radius

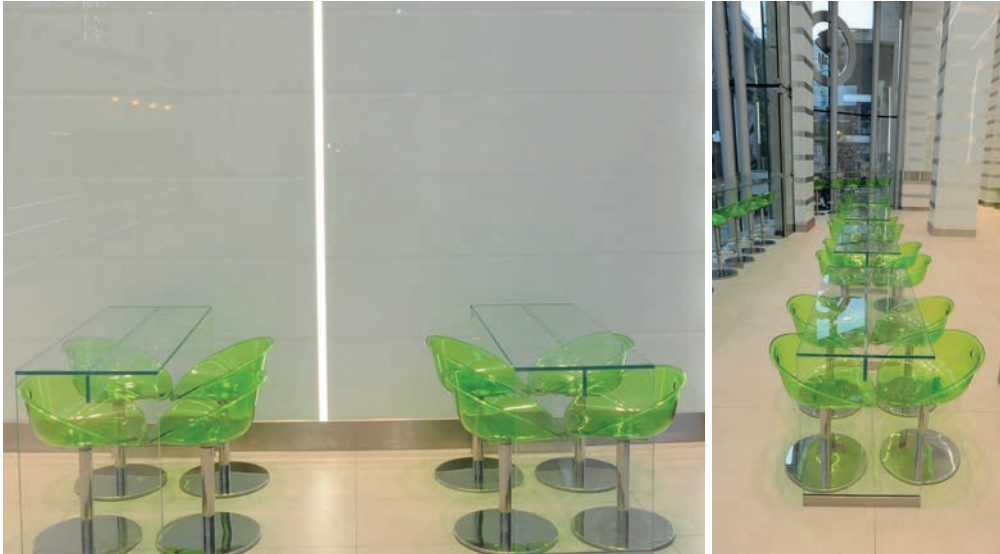

---

The refurbishment of a three storey office building, totalling 39,000sqft. Works included painted glass lift fascias, matching bathroom splashbacks and made-to-measure oversized mirrors. GMT's large stock of pre-painted glass and mirror, meeting European quality standards, allowed for competitive pricing and turnaround time.

## Case Study Two: Wasabi

---

As part of Wasabi's rapid expansion throughout the UK, GMT offered a turnkey solution for all their glass requirements. UV bonded tables and counter fronts were fabricated using 15mm glass. Fridge fronts and bevelled feature walls were installed in brilliant white to provide a hygienic, low maintenance finish.

## Case Study Three: Walker Morris

---

GMT supplied and fitted bespoke coloured glass to match company branding in tea-points, breakout areas and washrooms. Lift fascias were also clad in mirror as part of Walker Morris' project to smarten the working environment. Our in-house painting and processing facilities meant that high quality was ensured and their exact requirements fulfilled.
